The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply								
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Status

DETAILED ACTION

This Office Action is in response to the application filed February 9, 2002.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not understood as to how a PCB sandwiched between upper and lower plates; a decoder and a controller is a structure for packing/unpacking IC for preserving and updating data within the IC.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oldendorf et al. (6,166,324) in view of Elliott (US 2003/0032486 A1).

Application/Control Number: 10/073,087

Art Unit: 2822

As best understood, Oldendorf et al. teach a structure for packing/unpacking PCBs; an upper plate 30; a lower plate 40; a PCB (not shown) sandwiched between the upper plate and the lower plate, wherein the upper plate has a trough 32 and the lower plate is detachably connected with the upper plate and forming an electrical connection with the upper plate; and interface 52 & 62 detachably inserted into the trough (Figures 1-2, cols. 3-5, lines 64-67, 1-67 and 1-8). However, Oldendorf et al. fail to teach a decoder; a controller and buttons. Elliot teaches a decoder; a controller 56 and buttons 84 (Figure 1A, pages 3-4, paragraphs [0046]-[0057]). Since Oldendorf et al. and Elliot are from the same field of endeavor (encasing a PCB), the purpose disclosed by Elliott would have been recognized in the pertinent art of Oldendorf et al. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the structure for packing/unpacking PCBs of Oldendorf et al. by incorporating the encased PCB of Elliott to protect the data (abstract).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The following patents have been cited to further show the state of the art with respects to packing structures:

Shu (5,525,839)

Takubo et al. (5,220,486).

Application/Control Number: 10/073,087

Art Unit: 2822

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ida M Soward whose telephone number is 703-305-3308. The examiner can normally be reached on Monday - Thursday, 6:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 703-308-4905. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0956.
